Subject: ATSDR Costs

----- Message Contents -----

Pete/Beth

I was contacted by our Financial Management Office concerning the ATSDR Costs for the Carrier Air Conditioning Site on December 11. I was told that the ATSDR costs may not be correct.

Financial Management, after reviewing several ATSDR cost packages, discovered that ATSDR has only sent cost package that reflect an update of the costs for a Site. In otherwords for Carrier Air Conditioning, there may be additional cost before 1989. I must admit that we, Cost Recovery, have not received this news well. It is my understanding that EPA and ATSDR will be today or tomorrow to discuss this issue.

Furthermore I have requested that Financial Management review the past cost for the Carrier Site and determine if any additional costs exists. Also, I requested that Financial Management prioritize the Carrier Site and resolve this matter in the most expedient manner possible. Financial Management indicate that they would compile.

I will keep you appraised of this situation.
